Work and Internship Experience

ModalAI—San Diego, CA—Technical Documentation and Product Marketing Intern—June 2021 to Aug 2022
ModalAI is a drone hardware and software startup that builds compact, light-weight, and powerful robotic and drone perception, communication and control systems. Responsibilities included creating user centered product documentation and marketing content. Responsible for the maintenance of over a hundred pages of customer facing product documentation, including updates for product releases and product specifications. Created diagrams, wrote user guides and product marketing content. Produced a video submitted to AUVSI awards and half a dozen customer facing video tutorials.

Weatherford BMW of Berkeley—Berkeley, CA—Sales Porter
Aug 2019 to Jun 2020
Supported the sales department selling luxury cars. Organized the 400+ vehicles in the showrooms and storage lots and managed the flow of inventory between onsite and offsite storage. Stocked new and used cars, managed the battery tending process for over 200+ new cars, prepared cars for appointments, and conducted dealer trades around the Bay Area.

Microsoft via Murdoch Services—Berkeley, CA—Intern
Summer 2018
Performed analysis of Microsoft sales contracts based on internal team's feedback. Leveraged insights to provide recommendations for the execution of future deals. Contributed success story articles to the internal newsletter.

Reedcam Inc.—Shanghai, China—Web Design Intern
Summer 2017
Designed a website for a medical startup producing next-gen disposable endoscopes.

Projects   (more on matt.lohier.com)
Economic Conditions and Divorce
Pandas/Numpy project analyzing changes to employment rates, household income, and divorce rates in the United States. Included descriptive, exploratory, inferential, and predictive analyses in Python.

First Republic Mobile Redesign
Mobile redesign of firstrepublic website. Included user testing, competitive analysis, wireframes, lo-fi, and interactive hi-fi figma prototypes

Enrolled—Social Computing Space
Enrolled: A social computing experience that facilitates social interactions during class registration. A 10 Week Project designing, prototyping, and user testing a novel social computing space.
